

Dorian Gray's TEN FAVOURITE WEBSITES

I think that Dorian Gray would look at this site everyday, because he cares of his physical appearance! Just think that to stay young he sold his soul to the devil. www.tinybuddha.com
In this site he can read articles on how to improve his appearance.

The second site most visited by Dorian Grey is <http://royalcourttheatre.com>
Because Dorian is a fan of theater and fell in love with Sibyl Vane, an actress.

I think the main character of the book would hate this website but I think he would visit it often to find out news, maybe about crime and suicide...

If Dorian Gray lived in the twenty-first century in My opinion he would enjoy seeing his friend's site.
www.basilpicture.uk

I think also that the protagonist of the book should be every day in search of new techniques of seduce girls and I think this site is his favorite:
www.wikihow.com

Dorian really likes to be in the midst of rich and noble people of his time. Then I thought that he should always be looking for rules to behave appropriately.

Since Dorian is the most narcissist man in the world then I'm sure he would use www.camwow.it to take photos and share them obviously in a social network like www.instagram.com

The protagonist of this video is definitely a traveler then in the twenty-first century would certainly look for a site for low cost flights like www.expedia.co.uk

I think that could use it at any time to ask questions to the whole world and read answers maybe not what he thinks...
